Introduction

Due to the key role of labor market statistics in socio-economic planning, Qatar Statistics Authority conducted a labor force sample survey in the State, to understand the size and composition of labor force in Qatar. The survey provides significant data about the relation between labor market and the demographic, social and economic characteristics of the population, i.e. education and occupation. This set of data is important to design and assess the State's policies and programs, i.e. macroeconomic planning and development of human resources.

The survey was conducted in accordance with the International Labor Organization recommendations, as well as, selecting a well designed scientific sample, which allowed to build reliable projections for the society's landmarks and the conclusions of the main results was built on significant tests. Sampling information, estimate methodologies and the standard error were included in the annexes of this publication for the benefit of researchers.

Qatar Statistics Authority, who has the pleasure of publishing results of this survey, hoping to achieve its objectives and for the benefit of planners, researchers and interested persons.

We would like to express our gratitude to all sample households, for its positive response and cooperation, which had a significant impact in the success of the survey. We, as well, thank all survey staff, whether Qatar Statistics Authority employees or external participants.

Hamad Bin Jabor Bin Jassim Al-Thani
President, Qatar Statistics Authority

Executive summary

This report introduces the labor force characteristics, based on the 2011 labor force sample survey, which was conducted in the State of Qatar. The survey includes all Qatari and non-Qatari households, as well as, collective households. The reference period of the survey was March 2011. The estimates were built on a probability sample composed of 6,920 households and 35,839 individuals in the State.

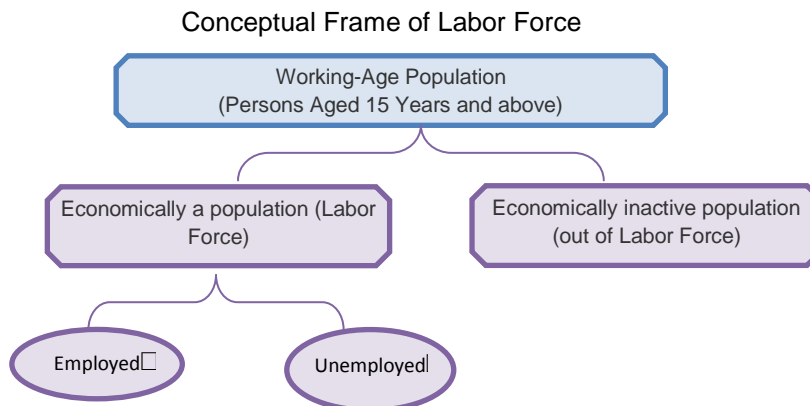

This survey introduces an update of the 2006, 2007, 2008 and 2009 labor force surveys data.

The main indicators of the labor force survey shows the positive and enormous achievements in the economic status of the State. All demographic groups by nationality and sex in all age groups, recorded an increase in participation rate, accompanied by decline in unemployment rate. When the two are combined lead to a net increase in the economically active population in working age (employment rate / population). The main points that could be highlighted in the 2011 survey, are:

1. Increase of female percentage in labor force during the last years of the survey.
2. Employment rate approached 100% in Al Khor municipality.
3. Increase of Qataris' percentage working in private sector.
4. Unemployment rate is declining in the State of Qatar, in comparison with 2006 survey.
5. Dependency ration is declining, as a result of participation in the State's economic activity.
6. Females spend more hours in work than males, in the last surveys.
7. Differences in monthly wage of some occupations and economic activities between males and females.
8. The main occupations of Qataris are clerks, professionals, technicians and managers.
9. The main economic activities of Qataris are public administration, mining and quarrying, education, health and financial mediatory.

Concepts and classifications

- **Economically active population:** That part of the population in working age, which includes employed plus unemployed, or all individuals who participate with their physical and mental effort in any work relevant to producing goods and services, and includes the employed and unemployed.

- **Employed:** All persons aged 15 years and above, who were during the week preceding the survey:
 - A- Perform a work for a wage, salary, profits or household gains, whether it was in cash or in kind.
 - B- Temporarily not employed, however, they are still have an official relation with their work
- **Paid work:** The persons who have work, whether they were working or temporarily not working, and performing their work in exchange for wage and salary, whether in cash or in kind.
- **Self employed:** The persons who own a project, and work or temporarily do not work. Those persons are performing their work profits or household gains, whether in cash or in kind, through a commercial work, farm, contract to present services or other projects.
- **Unemployed:** All persons aged 15 years and over who were, during the week preceding the survey, without work and were willing to work and looking seriously for work. There is a distinction between two kinds of unemployed persons:

- A- **First time unemployed:** They are the persons who never worked previously, and were during the week preceding the survey looking actively for work. Those are called “new comers” too.
- B- **Unemployed who previously worked:** They are the persons with previous experience work and during the week preceding the survey were actively looking for work.
- **Labor force participation rate:** It is the percentage of the current economically active population, i.e. the labor force, of the population in working age.
 - **Unemployed rate:** Percentage of unemployed of the labor force.
 - **Employment rate:** Percentage of employed persons of the labor force, which is the complementary of unemployment rate.
 - **Dependency ratio:** Percentage of not-economically active population of the persons in working age, it is usually expressed as follows:
$$\frac{\text{No. of persons aged (0-14)} + \text{No. of persons aged (65+)}}{\text{No. of persons aged (15-64)}} \times 100$$
 - **Economic dependency ratio:** (No. of population – employed) / employed * 100.

The State of Qatar is the second smallest country among the Gulf Cooperation Council Countries, area wise, which amounts to (11,586) square kilometers. The State of Qatar was flourished during the last few years in different economic aspects. Its projects and investments were diversified as a result of increase in labor force and productivity of Nationals and residents. The labor force survey report browses the labor force characteristics, and sheds the light on the key indicators of labor market. It also deals with their employment, occupational and economic activities status, and comprises number of unemployed in the State and their ages, educational status, duration of looking foe a job, attendance of training courses, reasons of unemployment, reasons for not looking for a job, reasons for not working for the private sector and unemployed willing to work for the private sector.

Below is analysis of 2011 labor force sample survey, which is divided into 6 themes:

- Population in working age (15 +).
- Labor force.
- Average weekly working hours.
- Average monthly wage.
- Unemployment rate.
- Economically inactive population (15 +).

Population in working age (15 +)

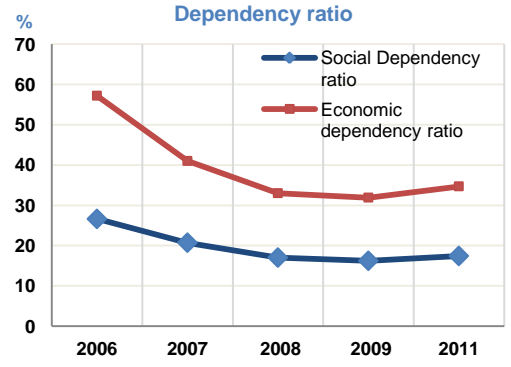

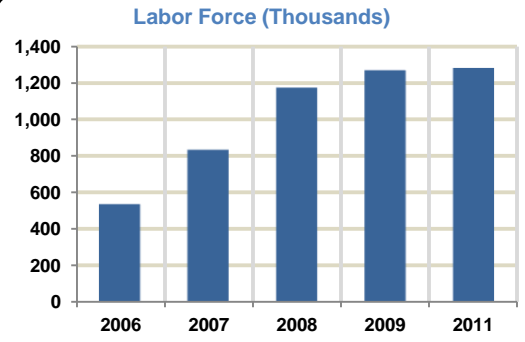

The 2011 annual labor force sample survey estimated number of population in working age about 1,473 thousand persons, among them 1,169 thousands males and 303 thousands females. Number of Qataris was 159 thousands and non-Qataris 1,314 thousands.

Labor Force

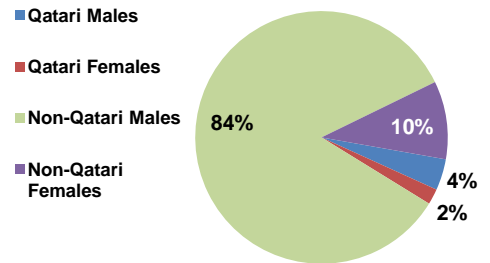

Labor force size in the State of Qatar increased by four-folds during the last ten years, where it amounted to 1,277 thousands in 2011. Qatari labor force amounted to 77 thousands and non-Qataris to 1,200 thousands. The labor force in the age group 20-44 amounted to about 81.3% of the total labor force, and non-Qatari labor force was about 90% of total labor force in 2007, to approach about 94% in 2011.

The annual indicators highlights that percentage of females in labor force had increased in the previous years, it was 10.7% of the total labor force in 2008 and increased to 12.4% in 2011. As for municipalities, the labor force is concentrated in Doha and Al Rayyan municipalities, percentage 71%.

For every one Qatari employee, there are 16 Non-Qataris

Percentage distribution of Labor force 2011

Every 10 employees are counting 3 individuals

Labor force by educational status

62% of the total labor force hold a degree less than secondary education, while three quarter of the Qataris hold secondary degree or higher.

Participation and employment rate

Total participation rate amounted to 86.7%, 95.7% for males and 52.1% for females, 2011. This means that among every 10 persons in working age there are 9 persons participating in the labor force.

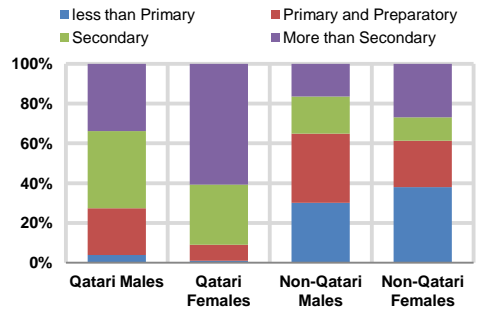

Participation rate for Qatari males is double that of female Qataris

The age group (25-34 years) represents the highest participation rate with 93.1%, and youth (15-24 years) participation rate was 68.8%.

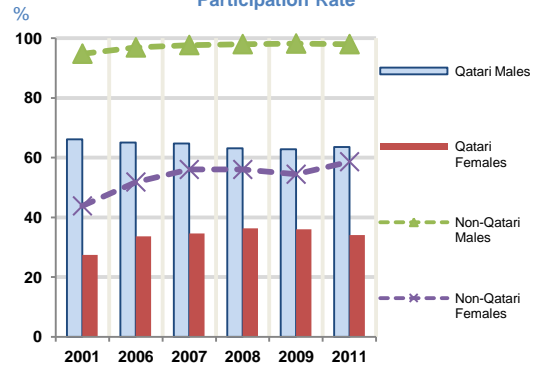

The participation rate for municipalities was high in Al Khor, Al Wakra and Al Dhayin municipalities.

Employment rate in Al-Khor was 100%

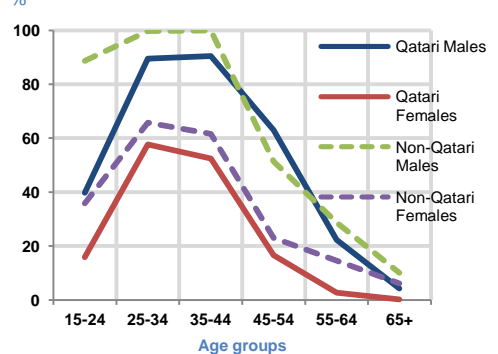

Labor Force by educational status 2011, Percentage

Participation Rate

Participation Rate by Age Group 2011

Labor force by sector

85% of the working population works for the private sector, most of them are non-Qataris, while percentage of Qataris comprises 0.5%.

Average weekly working hours

Average weekly working hours was 51 hours, for males 51 hours and females 53 hours.

Workers in ordinary occupations work for 57 hours weekly, and 55 hours in machine

Average weekly working hours in the private and domestic sector was 50 hours

operating occupations, while domestic and construction activities have the highest average weekly working hours.

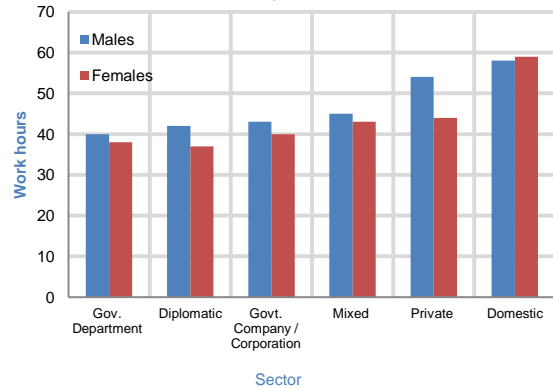

Average monthly wage

The average monthly was for all workers was 7,401 Qatari Riyals, while it was in establishment/government Company and mixed sector 17 thousands Qatari Riyals.

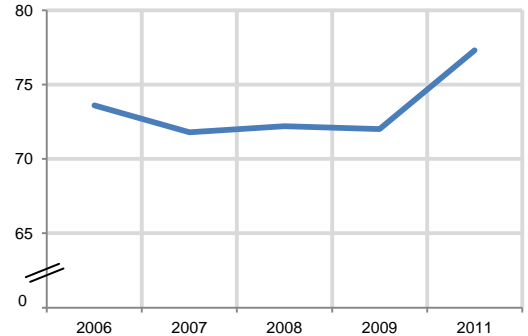

Average monthly wage & working hours, 2011

	Average working hours	Average monthly wage
Qatari Males	39	20,721
Qatari Females	38	15,313
Non-Qatari Males	53	5,588
Non-Qatari Females	56	3,634

Weekly Average Work Hours by Sector & Sex, 2011

Ratio of the wages average between males and females

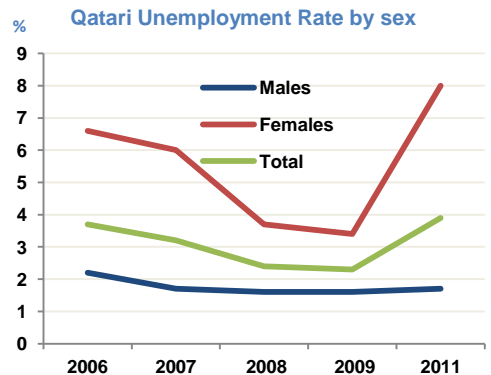

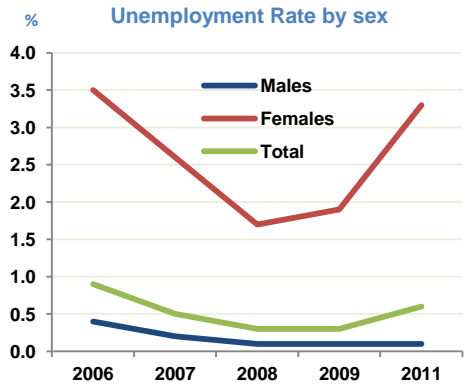

Unemployment rate

Total unemployment rate amounted to 0.6%, for males 0.1% and females 3.3%. The results show the three quarters of the unemployed have secondary education and above. 73% of the unemployed were looking for job for six months. Percentage of unemployed Qataris, whom spent six months looking for job, was 50%.

93% of the unemployed male Qataris did not complete their secondary education

60.7% of the unemployed Qataris were registered in manpower planning department, labor department or following up a bureau where they previously registered. About half of the unemployed Qataris have the desire to work in the private sector.

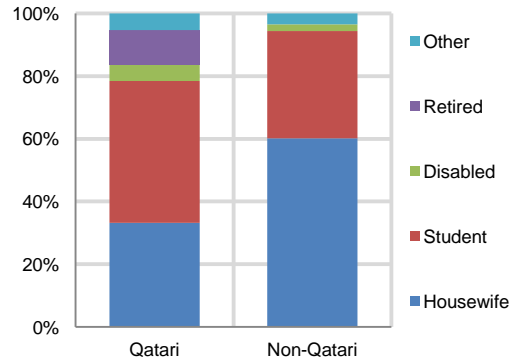

Half of the unemployed Qataris who have education lower than secondary, had enrolled in computer and English language training courses.

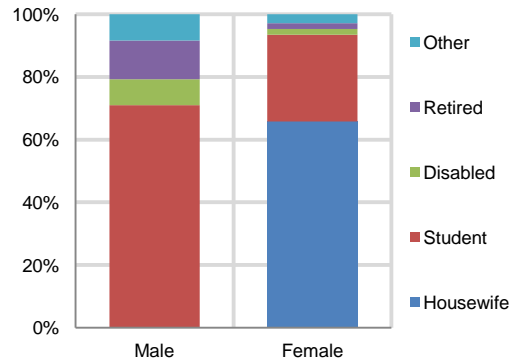

Economically inactive population (15 +)

Percentage of not-economically active population was 13.3%, 2011. Most of them were students and housewives, while percentage of Qatari not-economically active was 37%.

Economically inactive by nationality 2011, percentage

Economically inactive by sex 2011, percentage

Survey objectives

The survey aims to:

1. Estimate labor force size in the State of Qatar.
2. Distribution of labor force by different characteristics: Age groups, sex, educational level, marital status, employment status, economic activity, occupation, sector... etc.
3. Measuring employment and unemployment levels in the State of Qatar, and define characteristics and trends of unemployment to achieve the following objectives:
 - A- Follow-up the changes in employment and unemployment factors among Qataris, through supply and demand in labor market.
 - B- Study the socio-economic characteristics of the labor force, focusing particularly on unemployed and never employed individuals.
 - C- Draw employment policies and programs, to confront unemployment.
 - D- Assessment of recent unemployment remedy policies.
 - E- Assessment of accuracy of the common assumptions of unemployment, i.e. youths abstaining from work for the private sector.
4. Measuring partial unemployment, apparent and disguised, and indicate its reasons.
5. Study of the relation between occupation and education specialization.
6. Exploring reasons of youths abstaining from working for private sector and hand crafts.
7. Study the population classified outside labor force by: age groups, sex, nationality, educational level, marital status, desire to work, reasons of abstaining from work and reasons for leaving previous work.
8. Construction of updated database and make all data and information available for studies, comparisons and monitoring indicators on GCC and international level.

Survey description

1. Survey extent

The targeted population of the labor force survey are all Qatari and non-Qatari households in the State. This includes individuals living in normal and collective households. The collective households are a group of persons not related to each other and share living conditions in a residential unit, i.e. labor camps, students living boarding schools, nurses in hospitals... etc. The survey covered the small collective households (includes less than 7 persons) and large collective households (includes 7 persons or more). The survey did not cover short periods accommodation, i.e. hotels.

2. Reference period

- A- Reference period for questionnaire data: It is related to the existence of household members at the survey night (enumeration instant 31/3/2011).
- B- Reference period for labor force data: The week preceding reference instant of the survey (25/3/2011).

3. Axis covered by the survey

The survey measured the core labor force statistics: Economically active population, employment and unemployment and relevant economic and social variables, which includes, economic activity, occupation, educational level...etc. In addition to the key axis, the survey explored the income, working hours and work type of the employees, current and previous occupation, economic activity, employment status, work stability, reasons for not working part-time, secondary work (multiple occupations), duration and methods for looking for a job, reasons of unemployment or not looking for job, desire and readiness for work or training for work and other variables. The survey as well explored the methods previously followed by Qatari workers (less than 25 years of age) to obtain their current jobs, and reasons for not looking for job in the private sector by unemployed Qataris.

Survey execution

The 2011 labor force estimates are based on probability sample composed of 6,920 households and 35,839 individuals, distributed as shown in the table below. A geographic frame, based the counting blocks of the 2010 population census, and an independent samples were drawn, as population sampling units (PSUs), composed of one or more of the census counting blocks. The selection was made out of four areas, composed of:

1. Qatari households.
2. Non-Qatari households.
3. Small collective households (2-6 persons).
4. Large collective households (7 persons or more).

The final sample of Qatari, non-Qatari households and small and large collective households

Particularات	Lists		Sample	
	Households	Individuals	Households	Individuals
Qatari households	7,495	73,514	2,400	23,786
Non-Qatari households	12,894	43,680	2,420	9,582
Small collective households	3,805	13,049	900	3,670
Large collective households	-	-	1,200	9,185
